DETAILED ACTION

Election/Restrictions

- 1.1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claim 1- 10 drawn to an article, classified in class 361, subclass 760.
 - II. Claim 11- 20 drawn to a packaging system, classified in class 361, subclass 788.
 - III. Claims 21-28, drawn to method, classified in class 29, subclass 825.

The inventions are distinct, each from the other because of the following reasons:

1.2. Inventions III and I, II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case that the product as claimed can be made by another and materially different process. This product can be made by process without forming an encapsulation structure contiguous with the active component.

1.3. Inventions group II and group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (a packaging system) may work without the subcombination (an article) as claimed in claims 1-10, and uses a substrate with an encapsulation material. The subcombination (an article) has separate utility such as in devices which do not require using an encapsulation material.

1.4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

1.5. A telephone call was made to Mr. J. Greaves (Regis. No.40362) on December 8, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

1.6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2.1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yuriy Semenenko whose telephone number is (571) 272-6106. The examiner can normally be reached on 8:30am - 5:00pm.

2.2. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571)- 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

2.3. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
